### ARTIST STATEMENT

Being inspired by the complexity and wonder of nature, I am drawn to explore florals in a macro format. Primarily working in acrylics, I love to work on large canvas, to explore the intimate detail and intricacy of nature.

Personal or emotional connection to my subject is essential in my art and I find the action of a brush gliding over the canvas surface meditative.

While I have dabbled artistically on and off for my own pleasure over a number of years, it has only been in the recent few years in which I have seriously explored and invested in developing my artistic style.
